

Automated Blood Management Refrigerator

HXC-149R/429R/629R/629RB

Scope of Application:

Suitable for blood transfusion departments, operating rooms, and emergency rooms

Innovative Design

- Intelligent blood management system
- Reduce waste and improve efficiency
- Ozone sterilization
- Automated inventory checks

Qingdao Haier Biomedical Co.,Ltd.

No.280 Feng Yuan Road, High-tech Zone,

Product Advantages

Reduce Waste and Improve Efficiency

Rapid, electronic cross matching, the RFID electronic tagged blood bag's position illuminates for quick retrieval. Request blood at bedside, allocate, collect and transfer whilst monitoring the temperature across the whole process.

Intelligent Blood Management System

Allows integration and coordination of blood recovery within hospitals and blood allocation between hospitals and even across regions through the blood network cloud platform. Enabling the rational use of blood upon demand, thus reducing resource consumption

Multi-mode Operation

- Blood transfusion department mode: write the blood bag information into the RFID tag, read the tag information through the antenna board, and view the blood type, expiration date and other information
- Forward mode: operating room, emergency, ICU and other scenes
- Temporary storage mode: surgical blood preparation is temporarily stored. It can be re stored if it is not used up

Drastically Improves the Speed of Delivery

Innovative blood bank system, enables the blood to be advanced to the operating room to achieve 1-minute rapid blood collection

Ergonomic Design

Ozone Sterilization

Standard ozone module, according to the actual need to set regular disinfection time, without manual disinfection

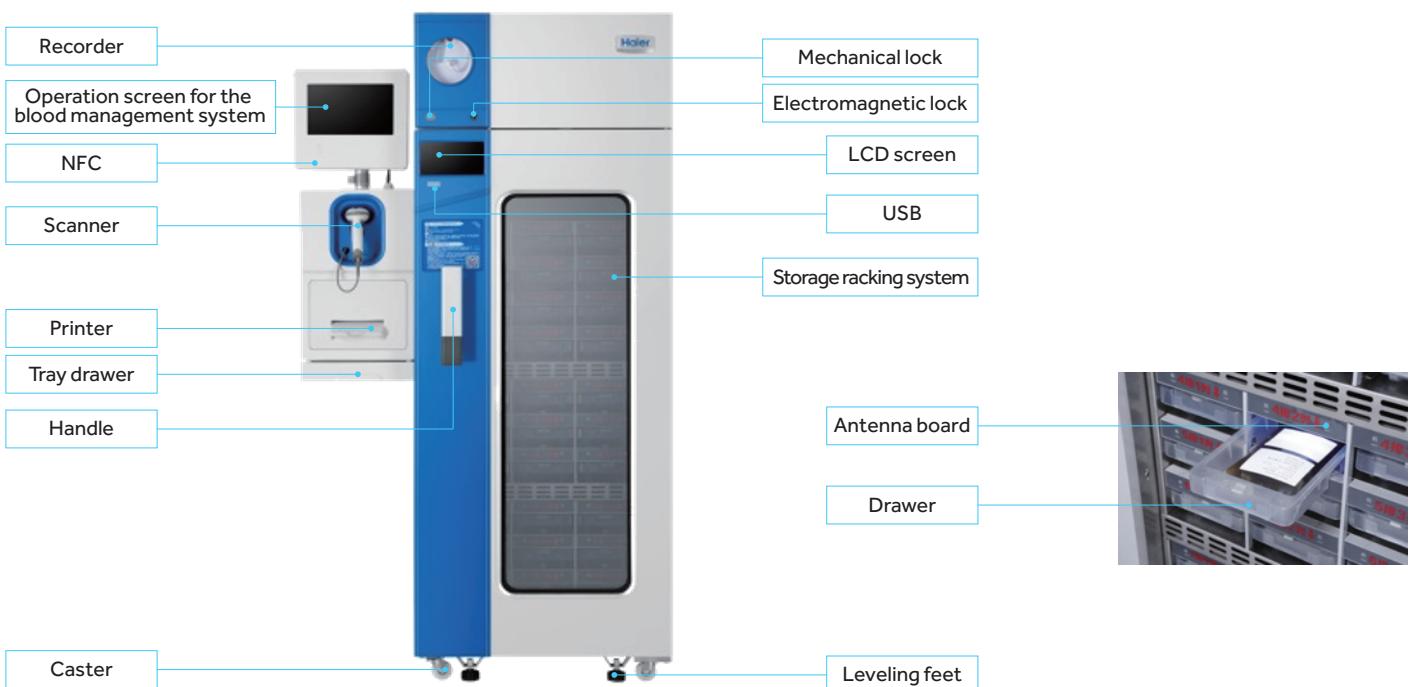

Automatic Inventory

Automatic inventory and blood bag information at a glance
